

Request for Proposal (RFP)

AI-Powered Automation System for Proposal Generation – Tata Power

Issued by: Tata Power Company Limited

RFP ID: TPCL-2025-AI-001

Date Issued: October 21, 2025

1. Introduction

Tata Power invites proposals from qualified AI and automation solution providers to design and implement an intelligent system for automating the Request for Proposal (RFP) generation process.

This initiative aims to enhance the speed, accuracy, and efficiency of Tata Power's bidding operations through the deployment of **Agentic AI systems**, **process orchestration**, and **secure data workflows**.

2. Scope of Services

Respondents must propose an AI-driven automation platform capable of understanding complex RFP documents, identifying key parameters, and autonomously generating proposal drafts.

The system should support data ingestion from multiple sources (technical catalogues, pricing databases, and compliance documents) and enable **human-in-the-loop verification**.

3. Proposal Questions

3.1 System Overview

Q1: Provide an overview of the proposed AI automation system, its architecture, and underlying technologies.

Q2: Describe how the system ensures accuracy, transparency, and data security in RFP generation.

3.2 Technical Capabilities

Q3: What types of documents and formats can the system ingest and process? Provide examples.

Q4: Explain how the AI identifies, categorizes, and maps technical data to proposal templates.

3.3 Performance and Integration

Q5: Specify processing times for standard RFPs and scalability with concurrent users.

Q6: Describe integration capabilities with Tata Power's existing ERP, CRM, and data storage systems.

3.4 User Interface and Collaboration

Q7: Outline the user interface design for proposal generation, review, and collaboration between departments.

Q8: How does the system handle multiple approval workflows and audit tracking?

3.5 AI Model and Learning

Q9: Detail the AI's learning mechanism — how does it improve proposal quality over time?

Q10: Explain how domain-specific fine-tuning or custom models can be incorporated.

4. Submission Requirements

Respondents are requested to submit:

- A detailed written response addressing all questions
 - Technical documentation and system architecture overview
 - Case studies or prior implementations in industrial or energy sectors
 - A signed cover letter confirming capability and interest in collaboration
-

5. Evaluation Criteria

Proposals will be evaluated on:

- Technical soundness and innovation of the proposed solution
- Demonstrated scalability, accuracy, and data security

- Proven track record in enterprise AI deployments
 - Clarity, feasibility, and overall value to Tata Power's operations
-

6. Response Deadline

All proposals must be submitted by **November 30, 2025**.
